

## **My top three places**

Let me tell you about my favourite places. The place I like most is my own room. I just really love it, because it looks how I wanted it to look, and I can always be alone there. I also like listening to my favourite songs in there, because I can turn them on as loud as I want. The best thing about my room is that it has a TV. I really enjoy watching TV at night and in the morning. I always do my homework there, because I have a very big desk.

My second favourite place is my grandma's house. I truly love being there because my grandma is the kindest person I know, and I love the food she makes. It is delicious. My cousins are also often there and it's always a lot of fun. After school I always go there to eat and then play with my cousin. I sometimes sleep at her house and that is also cool. What I think is very special about my grandma's house is that she has an elevator.

My third favourite place is my grandma's pool house. I often make parties there with my friends. It has two very big installed music boxes. We also have a fun, colourful disco ball there.

What are your favourite places?
