

MY TOP THREE PLACES

I think many places are very beautiful, so it wasn't easy to choose three. But these are my top three places:

My third place: Is the window in my old room. A few weeks ago, my brothers and I change our room. But before this happened I loved sitting on the board of my window. I watch the cars or when it rain, I sit there and listen the raindrops falling on the floor.

My second place: Is the flower shop of my aunt and uncle in Salzburg. When my family and I visit our relatives we go there every time. It's not very big but I love running along the corridors. Or look at the colourful flowers and the decoration.

My first place: My first place is my new room - it's not the biggest but it definitely is my favourite place my favourite place. I love to read in my book or play my Xylophone there. With the Radio I sometimes listen to music

I hope I can show you my top three places!
